

Product Sectors at the event:

Urban Connectivity

Roads, Bridges & Tunnels:

Engineering, heavy constructin, remote working (lighting, accomodation), concrete, asphalt and special structures

Rail Ways, Metros & Trams:

Engineering, heavy specialist product, specialist production, subsurface, tunneling, equipment & tools, technology, traffic management

Airports & Ports:

Planning & monitoring systems, equipment manufacturers, terminal operators, runway, power, buildings, very specialist, hydraulic works, trasmission lines, data, heavy construction, communication

Utilities

Power:

Electric power generation, distribution, connectivity, renewables, technology

Water:

Desalination & watertreatment plants, product generation, distribution, connectivity, sustainable management, channels

Communications:

Innovative solutions, IT, fiber optics, distribution, connectivity, transformers

Smart Technology

Construction Tech:

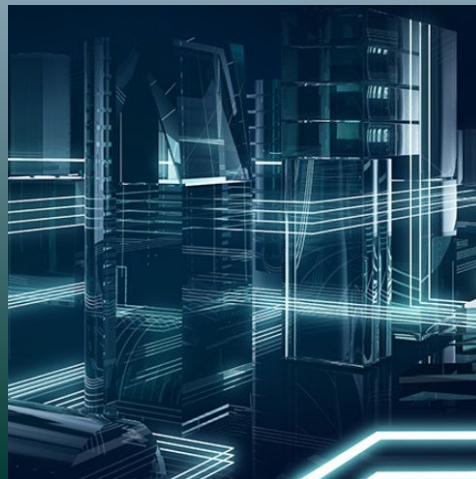

Smart building, smart power, smart water, smart enviroment

Sustainability:

Climate change, energy management, waste management

Mobility:

Big data, artificial intelligence, smart transportation

Water & Waste

- Drainage systems
- Drilling technology, Pumps, Tubes Valves fittings
- Sewage water technology, sewer systems, road cleaning
- Water extraction, water technology, water treatment, desalination plants
- Soil protection, air purification
- Waste disposal, waste plants & sanitary, waste management, recycling
