# DISCOVER THE OPPORTUNITIES IN THE GIGA-PROJECTS REDEFINING SAUDI ARABIA

**Saudi Arabia is transforming into a global infrastructure hub. A \$300bn infrastructure projects plan including giga-projects such as NEOM, The Red Sea Development Project, AIUla, Amaala and Qiddiya Entertainment City are at various stages of development.**

The Kingdom is diversifying away from being an economy based on hydrocarbons to a diverse and rapidly growing one based on privatization, international investment and sectors such as tourism, manufacturing, real estate, agriculture, and entertainment.

The infrastructure projects plan create an abundance of opportunities in areas such as smart cities, transportation, utilities, water and clean energy as the country looks to provide its citizens with cities of the future underpinned by Saudi Vision 2030.

This thriving economy and vibrant society is now open to the world with significant business opportunities.

## SCALE OF ONGOING AND PLANNED PROJECTS

# A FORUM FOR THE ADVANCEMENT OF INFRASTRUCTURE IN SAUDI ARABIA

The successful launch of Saudi Infrastructure Expo was officially opened on 6th September 2022 by Eng. Thabet Al-Sawyeed, Governor of Saudi Contractors Authority.

Saudi Infrastructure Expo brings experts together to accelerate projects and drive meaningful and sustainable progress for the country. The market is now ripe for a further stage of change as the demand for infrastructure surges.

Saudi Infrastructure Expo has firmly established itself as the Kingdom's leading event for showcasing and discussing what's needed to fulfill Saudi Arabia's ambitious infrastructure plans underpinned by Saudi Vision 2030.

We are pleased to announce that the 2nd edition will take place from 11 - 13 September at Riyadh International Convention & Exhibition Center. The larger venue space will result in more exhibitors and active buyers for the next edition.

# DO BUSINESS BY BEING PART OF THE ONLY DEDICATED INFRASTRUCTURE EVENT IN THE REGION

## WHAT TO EXPECT IN 2023?

# A DEDICATED ZONE TO SHOWCASE YOUR PRODUCTS AND SERVICES IN THE \$40BN SAUDI WATER MARKET

## MARKET OVERVIEW:

Saudi Arabia has seen exponential growth and investment in the water market, however, so much more is required. The Kingdom faces serious challenges, the climate is arid, renewable water is scarce while urban water and sanitation services are costly for the government.

The country has allocated \$40bn for water projects under a 5-year plan that includes 1,335 projects. Saudi Arabia is currently the world's largest desalination market. The Kingdom's National Water Strategy 2030 will need to cater for Saudi Arabia's population growth and rise in GDP.

Investing heavily in its water infrastructure has resulted in Public-Private Partnerships. PPPs account for 70% of its water processing infrastructure already so lucrative business opportunities exist for private entrants. The National Water Strategy aims to develop the water and wastewater sector through private sector participation. The model is already attracting local and international investors, contracts worth billions have been awarded and more awards and tenders will be released.
